## Self-recording a presentation

## General advice:

- For best results use an external USB-Microphone and an external Webcam
- If possible, set the video resolution to 1920x1080 pixels (Full HD)
- If possible, save the file as an mp4 with h.264 codec (most apps will do this anyway)
- It's most convenient to use Microsoft Powerpoint's built-in recording function.

- When you're ready, select Record and start speaking.
- To record from a specific slide, go to it, and then select Record. Note: Narration won't record when slide transitions happen so let these play first before you start speaking.

• When finished, stop the recording and end the presentation mode.

• You can preview your recording by clicking "Play"

• Save your video by clicking "File>Export" choose mp4 from the dropdown list, make sure the resolution is set 1920x1080 pixels and save the file to a location on your computer.
